

Add New Layers

5.3 Add New Layers

To add a new layer in GeoServer, follow the steps below

- On the left sidebar, select Stores.
- This will open the main Layers page where existing Layers are listed.
- On the Layers page, look for the Add New Layer link or button.
- Click Add New Layer to open the form for entering the details of the new Layer.

Type	Title	Name	Store	Enabled	Native SRS
<input type="checkbox"/>	buildings	imis_africa:buildings_layer	imis_africa_building_info	✓	EPSG:4326
<input type="checkbox"/>	citypolys	imis_africa:citypolys_layer	imis_atrica_layer_info	✓	EPSG:4326
<input type="checkbox"/>	containments	imis_africa:containments_layer	imis_base_fsm	✓	EPSG:4326

To add the new layer select the table you want to add layer to.

Add a new layer

Add layer from

You can create
On databases y
Here is a list of

Choose One

- imis_base:imis_base_building_info
- imis_base:imis_base_fsm
- imis_base:imis_base_grey_water
- imis_base:imis_base_layer_info
- imis_base:imis_base_public_health
- imis_base:imis_base_swm_payment_info
- imis_base:imis_base_taxpayment_info
- imis_base:imis_base_utility_info
- imis_base:imis_base_waterpayment_info
- imis_base:public
- ne:NaturalEarth
- nunc:arcGridSample
- nunc:img_sample2
- nunc:mosaic

Table Name	Action
use_categories	Publish
water_sources	Publish
wms_links	Publish

Figure 6 Adding new layer

Once you have chosen the table you can either publish or Configure new SQL view, which you can see in the figure 5.
