1.2.11 Settings

This is a module to allows administrators to manage user access and control permissions within the system. Features include:

User Credentials - Securely store and manage user authentication details, including usernames, passwords options.

Roles Management- Create and assign roles to users, defining their access level and responsibilities. Roles can be customized to reflect specific job functions.

Permissions Control - Fine-tune access by assigning permissions to roles or individuals, ensuring users can only interact with data and features relevant to their role.
