Implementation of IMIS in Mahalaxmi Municipality and Its Role in Standardizing the Sanitation System (November 2024)

Status and public understanding of sanitation systems before ISO 24521 implementation

The census initially reported that 55.5% of buildings had septic tanks, but a detailed investigation of containment revealed that the actual figure was only 10.75%.

Building construction permits issued after the integration of IMIS and e-BPS

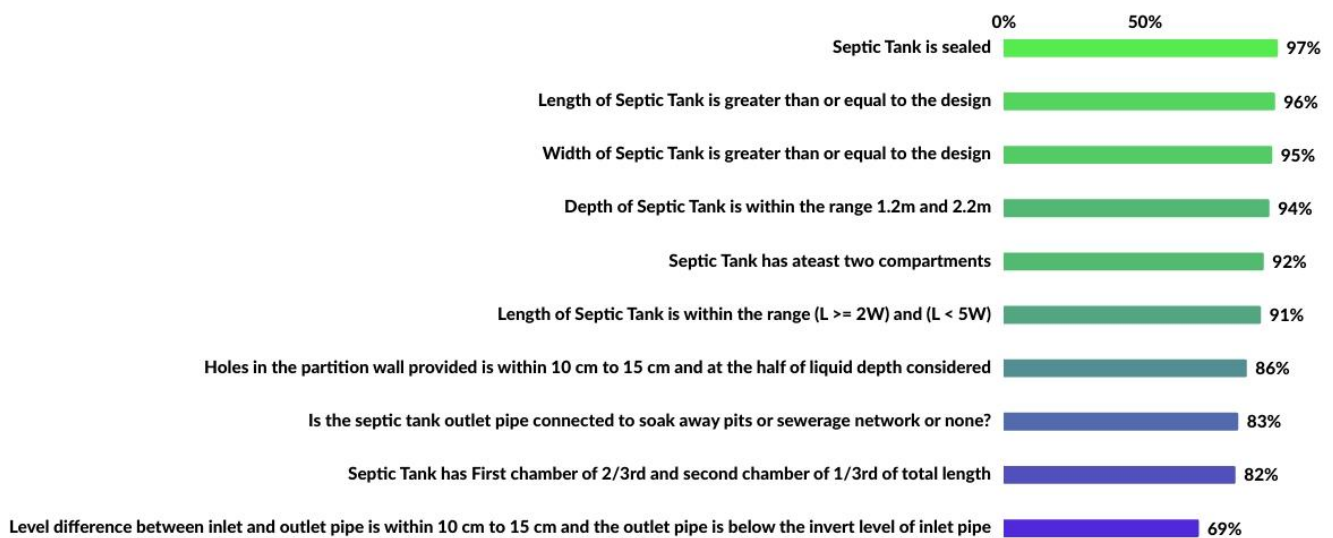

After the integration of IMIS and e-BPS, all buildings, along with their footprints and sanitation systems, are now maintained in IMIS (total buildings: 3,022).

Trend of Buildings with Standard Septic Tanks

Buildings satisfying standard Septic Tank compliances
